HIV/AIDS Treatment Cascade

The HIV/AIDS treatment cascade above shows a comparison of the national, state, and local data of person living with HIV/AIDS receiving the full benefits of the medical care and treatment.

National HIV/AIDS Strategy For The United States (July 2010)

Vision for the National HIV/AIDS Strategy

“The United States will become a place where new HIV infections are rare and when they do occur, every person, regardless of age, gender, race/ethnicity, sexual orientation, gender identity or socio-economic circumstance, will have unfettered access to high quality, life-extending care, free from stigma and discrimination.”

National HIV/AIDS Strategy

Goal 1: Reducing New HIV Infections

Goal 2: Increasing Access to Care and Improving Health Outcomes for People Living with HIV

Goal 3: Reducing HIV-Related Disparities and Health Inequities

Goal 4: Achieving a More Coordinated National Response to the HIV Epidemic
